About Facebook's Community Action Grants

Facebook's mission is to give people the power to build community, and Facebook's Clonlee Data Center is committed to building strong partnerships within the Meath community. We work globally but live locally. We are excited to be in Meath and embrace the opportunity to have positive, local impact. Each year, we open our Community Action Grants programme to local schools and not-for-profit organisations to support their projects in the community. We are humbled by the great work that our grant recipients do to make our community a better place.

"We are delighted to be awarded this grant to immediately progress a project in our pre-school childcare that otherwise would not have been possible until 2024 or beyond. The project aims to give young children a small but impactful taste of STEM subjects which in turn may trigger an emergent interest in these subjects as they progress through the education system and life itself."

– St. Olivers Community Centre

Since 2019, 43 projects have received Community Action Grants in Meath.

Who can receive the support?

The Community Action Grants programme is designed to support needs in three focus areas:

- Address critical community needs by putting the power of technology to use for community benefit.
- Connect people online or off.
- Improve local STEM education.

Local schools and non-profit organisations in County Meath are welcome to apply for support for short-term projects that focus on at least one of these areas.
